To Whomsoever It May Concern

Subject: Layout Map Description

We would like to clarify that with reference to the deficiency raised by you regarding the Layout Map, we are submitting the following explanation and compliance response.

- Our institute is equipped with a Smart Computer Lab, where all IT training sessions are conducted. The lab includes Smart Boards, ergonomic furniture, and a professional environment suitable for both lectures and hands-on training.
- As the nature of training is IT-based, both theory and practical sessions are conducted within the same classroom using digital tools to enhance learning outcomes.
- The staff room is present in the video and is located in a glass-enclosed cabin at the back side of the lab. It is equipped with faculty workstations.
- The reception area is integrated within the same room in the counsellor's Room, located near the entrance, and is actively used to handle walk-in queries and student support.
- The library is also located within Computer Lab 1, with all relevant books organized and stored in a wall-mounted cabinet, fully accessible to students for reference.

This declaration is issued to clarify and confirm our current status and our on-going efforts to meet the required standards.

Warm regards,

For SWASTIK INFOTECH
